- Price: 2200-5000USD
- Delivery Time: 20 days

Product Specification

- Voltage: 220V
- Dimensions: Customized
- Application: Gasoline, Diesel, New Energy
- Capacity: 1000L - 6000L
- Flow Rate: 40-60L Per Minute
- Power Source: Electric
- Color: White
- Material: Plastic
- Highlight: mini fuel station 40l/min,
60l/min mobile filling station,
automatic nozzle mini fuel station

Product Description

Automatic Nozzle Type Mini Fuel Station for Plastic Containers

Product Description:

The Mini Fuel Station comes in an elegant white color that is sure to complement any environment. Its hose length of 6 feet is perfect for reaching any fuel tank, making it easy to use and operate. The hose is made of high-quality materials that ensure durability and longevity, making it an ideal choice for those who want a product that will last for years to come.

Safety is a top priority when it comes to the Mini Fuel Station. It features an overfill protection system that prevents spills and accidents. Additionally, it has an automatic shut-off feature that stops the flow of fuel when the tank is full. These safety features make it a reliable choice for anyone who needs a mobile gas station that they can depend on.

The Mini Fuel Station is suitable for a variety of applications. It can be used to dispense gasoline, diesel, or new energy fuels, making it a versatile product that can be used in many different industries. Its plastic construction ensures that it is lightweight and easy to transport, yet still durable enough to withstand regular use.

Overall, the Mini Fuel Station is a must-have product for anyone who needs a reliable and convenient way to dispense fuel. Its compact size, lightweight design, and safety features make it the perfect choice for those who need a mobile gas station that can be easily transported to any location. So, whether you're in the construction industry, agriculture, or any other field that requires fuel, the Mini Fuel Station is a product that you can count on.

Applications:

One of the primary applications for the Virette C1 Mini Fuel Station is in remote locations where traditional fueling stations are not available. This could include construction sites, mining operations, and other remote worksites. With its compact size and customizable dimensions, the C1 can be easily transported to these locations and set up to provide fueling services as needed.

Another common application for the Virette C1 Mini Fuel Station is as a backup fueling option for businesses and organizations that rely on vehicles and equipment for their operations. Having a mobile fuel station on site can help ensure that fuel is always available, even in the event of a fuel shortage or supply interruption.

The Virette C1 Mini Fuel Station can also be used as a Fuel Mobile Dispenser, providing a convenient and efficient way to refuel vehicles and equipment on the go. This makes it an ideal choice for businesses and organizations that operate vehicles and equipment in multiple locations or that require frequent refueling.

With its ability to handle a variety of fuel types, including gasoline, diesel, and new energy, the Virette C1 Mini Fuel Station is a versatile product that can be used in a range of scenarios. Its electric power source makes it an eco-friendly option for businesses and organizations that are looking to reduce their environmental impact.

The Virette C1 Mini Fuel Station is available in a range of capacities, from 1 to 8CBM, and can be customized to meet specific needs and requirements. Its white color and sleek design make it a visually appealing option that can blend in seamlessly with any environment.

With a price range of 1000-5000USD and a delivery time of 20 days, the Virette C1 Mini Fuel Station is a cost-effective and efficient solution for businesses and organizations that require a mobile gas station.

Customization:
